## CHERRIES

### SOLUTIONS FOR THE CROP JOURNEY.

At AgroFresh™, we know that producing quality cherries requires a comprehensive approach from field to shelf. Our portfolio of solutions for cherries is designed to help you optimize every step of the journey, from increasing yield potential during pre-harvest to maintaining quality and freshness in storage and throughout the supply chain. With a focus on innovation, efficiency and sustainability, we offer a full suite of products to help you deliver the best cherries possible.

#### PRE-HARVEST SOLUTIONS

Gain greater control over how your cherries develop, supporting a better yield and higher quality fruit as you head into harvest.

- May increase yield potential by up to 15%\*
- Interrupts negative ethylene effects, extending the pollination window
- Helps produce more and bigger fruits per branch
- Helps improve fruit set and quality
- Helps enhance revenue potential with greater consistency

#### DIGITAL SOLUTIONS

Get a digital edge on making informed decisions based on real-time data to maximize the potential of your cherry crop.

- FreshCloud™ Harvest and FreshCloud Inspection options for optimal monitoring
- Provides end-to-end data visibility throughout the crop journey
- Decision-making insights to minimize fruit loss
- Integrates seamlessly with existing IT systems
- Scalable to meet the unique needs of your operation

#### POST-HARVEST TREATMENT EQUIPMENT & TECHNOLOGY

Protect your cherries after harvest with equipment and technology that helps maintain quality of cherries while reducing operational costs.

- Rationalized application of fungicides, coatings and disinfectants for better efficiency
- Reduces water use post-harvest—up to 60% compared to conventional systems
- Automated packline integration for applying disinfectants and fungicides
- Ultrahumidification (portable and stationary) to maintain optimal storage conditions through humidification or disinfection

## FUNGICIDES

Protect your investment with our range of fungicides that help cherries remain fresh and ready for market.

 **ActiSeal™**

 **PacRite®**

 **Shield-Brite®**

- Effective protection against decay and its impact on economic losses
- Various fungicide formulations tailored for cherry preservation

## COATINGS

Our coatings give your cherries the protection they need to look great on the shelf while maintaining their freshness.

 **Semperfresh™**

- Protects cherry stems from dehydration, keeping stems greener for longer durations
- Extends shelf-life and enhances visual appeal, helping to boost marketability

## DISINFECTANTS

Maintain high standards of food safety and decrease contaminants in water treatment with disinfectants.

 **Accu-Tab® SI**  
AUTOMATED CLEANING SYSTEM

 **Shield-Brite®**

- Accu-Tab® SI: An automated chlorine sanitation system providing residual protection against waterborne diseases, ensuring food safety; authorized for organic production; easy to monitor and control
- Shield-Brite® PAA: Disinfectants that help control spoilage and decay organisms in process water by using an effective sanitizer in wash tanks, flumes, hydro coolers, and spray applications

## READY TO MAXIMIZE THE QUALITY, YIELD AND PROFITABILITY OF YOUR CHERRIES?

Let's talk about how we can empower your business operations with tailored solutions that meet the needs of your business.
