

BE SMART. HAVE IT ALL.

SmartCitrus™ is a post-harvest quality system designed for citrus fruits.

SmartCitrus™ is your one-stop solution where you can find absolutely everything you need for your fruit.

SmartCitrus™ includes new sustainable solutions to protect our planet's resources.

What does SmartCitrus™ offer?

The fully integrated SmartCitrus™ system helps protect fruit from the moment it arrives at the packhouse, throughout the shipping process and all the way to retail. It takes special care to hold back disease and aging in citrus — and that's why AgroFresh offers a full portfolio of post-harvest fungicides, coatings and detergents. Below, we've highlighted our leading solutions for citrus customers.

Equipment	100%
Post-harvest treatments	100%
Technological solutions	100%

The new SmartCitrus™ quality system is built to address all your requirements.

Sustainable Post-harvest Solutions for Citrus:

For domestic and export markets, our line of innovative products is designed to help maintain the freshness of your citrus fruit to ensure healthy returns.

These technologies help maximize the efficiency of treatments and extend the life of treatment water. They support companies' sustainability goals by reducing water usage and its impact on the environment.

**SMART
